

## WHAT JOHN HUMPHRIES BANGLE SIZE SHOULD I BUY?

The Halo Bangle by John Humphries is offered in three size options: small, medium and large. A range of sizes means that you can find a custom fit and wear the bangles as John designed them, stacked on for an impactful, colorful look. Halo Bangles do not have a closure, you will have to slide them over your hand without opening them. If you already own a bangle bracelet that fits you nicely, measure the inner diameter and compare it to our size chart. The size that is the closest match to your existing bangle is your correct size. You can also measure the widest part of your hand (*see steps below*) to determine which size to order.

John Humphries bangles do tend to stretch a bit after wearing, so when in doubt or in between sizes, it is a good idea to choose the slightly smaller size.

Small = 2.25"-2.35" Inner Diameter    Medium = 2.45"- 2.55" Inner Diameter    Large = 2.65"- 2.75" Inner Diameter

Are you still unsure of your Halo Bangle size? Grab a tape measure and follow these 3 steps to determine which size will work best for you. If you are in between sizes, size down!

*Supplies: Tape measure, calculator*

1. Position your hand as if you were about to put on a bangle bracelet. Hold your hand parallel to the ground, fingers pointing straight ahead and thumb tucked under palm.

2. Wrap tape measure around the widest part of your hand (usually right around your knuckles) and record the measurement.

3. Using your calculator, divide your hand measurement by 3.14 ( $\pi$ ). Compare the result with our bangle measurements. If you are in between sizes, size down!
